FEATURES DESCRIPTION

L 

Oven Lamp - used to lighting the oven cavity in order to see the meal condition and make sure it is cooked at best condition.

R 

Turnspit (Chicken Rotisserie) - to grill and cook chicken inside oven, this function allow you also to grill leg of lamb, duck and other similar meals equally through rotating bar.

M 

Mechanical Timer - to fix desired timing for cooking, it rings on adjusted time period to warn you that the meal cooked and avoid you forget the desired time and burn the meal or over cooked.

D 

Digital Timer - to fix desired timing for cooking and it shut off the electrical oven on programed time, it warn end user by ringing to let end user check the meal condition and get best result, even though end user may program the oven to start at specific time and shut off at desired time, so no need to waste time, simply program the oven for needed time duration and activate it, the oven will start cooking the meal at programmed time and shut off at adjusted time.

A 

Analog Timer - to fix desired timing for cooking, it rings on adjusted time period to warn you that the meal cooked and avoid you forget the desired time and burn the meal or over cooked. The style of analog time is rustic for those who miss old days.

I 

Push Button Ignition - to ignite the gas burners, no need to use lighter or matched simply push the ignition button and ignite desired burner to start cooking.

I1 

One Hand Integrated Automatic Ignition - to ignite the gas burners automatically, the sparking fixed on the knob itself and make cooking much easier.
